About us

Chemring Nobel With an unbroken history of more than 130 years of explosives production, we have a very experienced and dedicated organization

operating modern manufacturing facilities in Saetre, Norway. We are recognized as a responsible and reliable partner with a focus on safety, innovation and customer service.

Chemring Nobel is a Norwegian-based speciality chemicals company with a tradition of innovation and development going back to Alfred Nobel. We deliver raw materials only — with a range of base products including HMX, RDX, NTO, Alkyl-NENAs. Based on these materials, we can produce formulations that are well adapted to customer needs in terms not only of safety

and sensitivity, but also performance and manufacturing applications. Our vision is to be a leading global producer of specialized energetic materials for the defense and civilian industries.

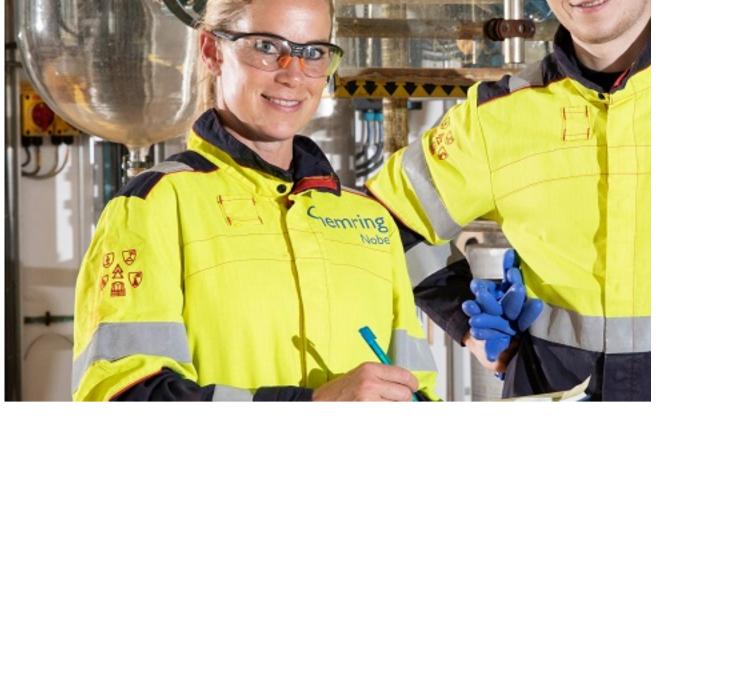

For our suppliers We are always looking to improve our relationship with our suppliers here at Chemring Nobel. To improve communication and simplify the flow of information we

We will continue to add important documents to this site in the future, aiming to make this a comprehensive overview of all the key information you need to be a successful supplier to Chemring Nobel.
